Open-source lab automation framework

Infrastructure as code

Deploy idempotent environments to your specifications anywhere

Runs with PowerShell on Windows and Linux

Deploys to Hyper-V and Azure

In active development: kvm/ qemu support on Linux

Deploys Windows and Linux VMs, Azure App Services

Intro - AutomatedLab

Zero-touch deployment of many roles, including (but not limited to)

ADDS

ADCS

ADFS

SQL Server 2008 – vNext

TFS/Azure DevOps Server

DHCP

DSC

Failover Cluster

Nested Virtualization

NuGet

SharePoint

Office Server

Demo: Pipeline for DSC configs

Summary

AutomatedLab helps with complex test environments

AutomatedLab deploys repeatable environments end to end

Help will be given to those that ask for it: <https://automatedlab.org>
